

WC Safety Protocols for Students and Staff

We all have to work together—maintain patience and positivity

Health Assessments

All students and staff are required to take their temperature & complete the self-monitoring questions daily to screen for any signs of COVID-19 before leaving home **every day**. All symptomatic individuals, **even those with mild symptoms**, must stay home and contact their primary physician for guidance.

Face Coverings

All K-12 students and staff are required to wear a multi-layer face mask or face shield anytime they are in the school or on a school bus. Masks may be removed for eating, mask breaks, or for students unable to wear masks due to medical restrictions (documentation required.) The WCASD will have extra masks available for students who forget their masks.

Handwashing/Hand Sanitizer

We will promote proper handwashing techniques and the use of hand sanitizing stations located throughout the schools during the day and particularly before consuming food and using the restroom.

Social Distancing

All students and staff must adhere to physical distancing guidelines at all times. Students will be socially distanced at six feet or to the maximum extent feasible when passing in hallways. Desks will be arranged facing the same direction and distanced to provide six feet between students.

Cleaning/Sanitizing/Disinfecting

High-touch surfaces and restrooms will be cleaned 3 times a day, and all other areas will be thoroughly cleaned in the evening. Spray bottles with disinfectant and towels will be available for every staff member. Shared surfaces and materials will be cleaned after each use.

Transportation/Busing

The driver and students will wear a mask at all times. Buses will be limited to two students per seat. Siblings will be seated together when possible. Buses will be disinfected and sanitized after each route. Please practice social distancing at the bus stop.

Ventilation

All units run continuously, and are set to provide 8 air change per hour or maximum amount feasible. All filtration systems on ventilation systems will be changed on a 30-day cycle.

Cafeteria

Meals will be served in the cafeteria, or alternate spaces, with students facing in one direction, 6 feet apart. At the elementary level, breakfast will be served in the classroom.
